Building Information Modeling (BIM): From Concept to Substantial Completion (and Beyond)

University of Massachusetts Medical School Albert Sherman Center

January 17, 2013

Connecting a World of [

Speakers

- Erik Servies, AIA
 - Associate, PMA Consultants, Owner's Project Manager
- John Baker
 - Associate Vice Chancellor of Facilities, UMass Medical School
- Mark Dolny, AIA, LEED AP
 - Associate Principal, Architectural Resources Cambridge (ARC)
- Tom Watson
 - Regional BIM/VDC Manager, Suffolk Construction

Presentation Goals

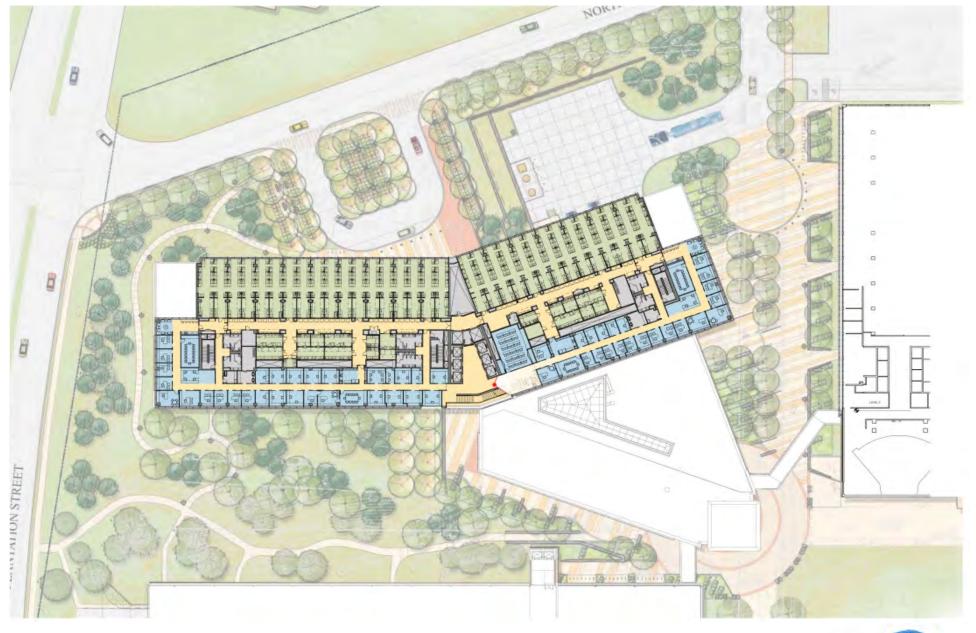

- UMMS Vision and the Albert Sherman Center
- ARC response to the vision
- UMMS Operational needs
- Suffolk Construction response to the vision
- UMMS managing BIM moving forward

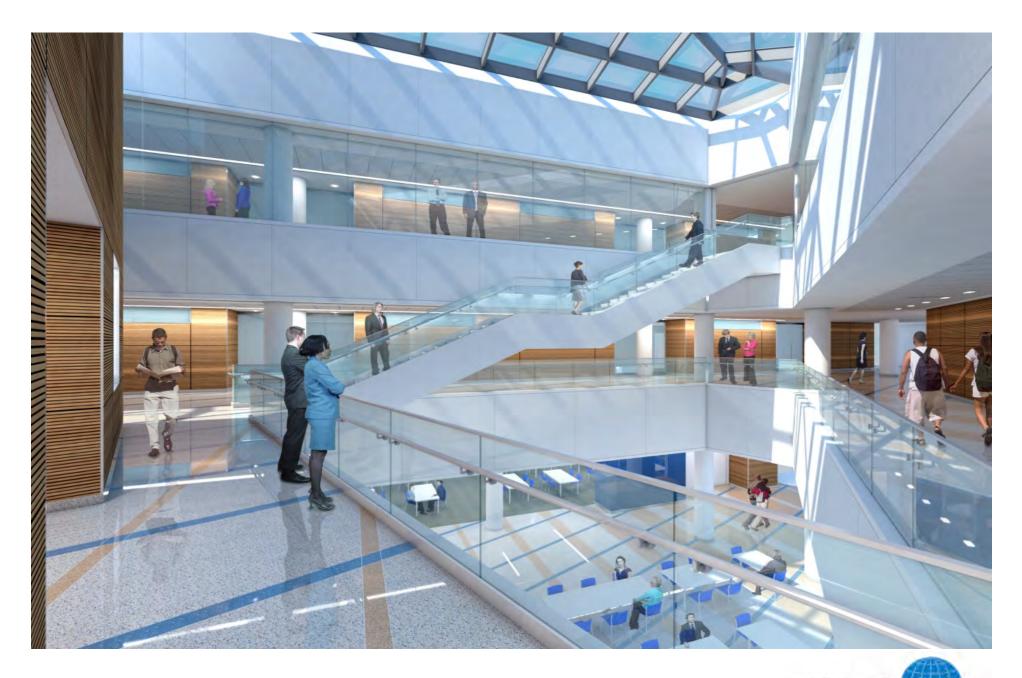

The Albert Sherman Center -Summary

- 515,000 SF BSL-2 Laboratory at the UMass Medical School
- Projected substantial completion 12/14/12
- Request from UMMS to utilize BIM for 6D deliverables

Connecting a World of Pharmaceutical Knowledge

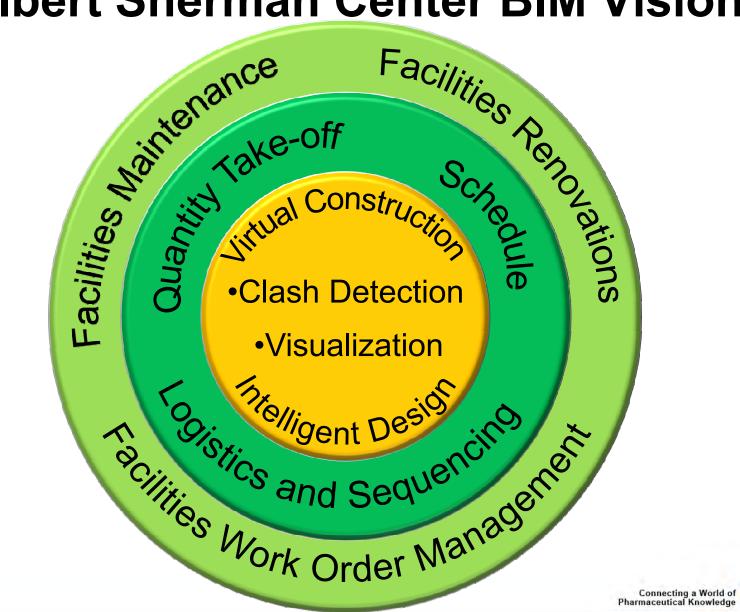

SP

Campus BIM Vision at Project Inception

- Improve the user acceptance process through visualization
- Improve construction productivity
- Increase MEP coordination and clash detection
- Utilize the model for facility planning, operations and maintenance

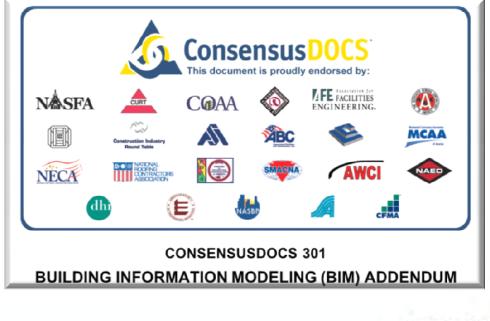

Albert Sherman Center BIM Vision

Managing BIM

- Team utilized a Consensus Docs 301 contract
- Creation of a BIM Execution plan with input from all parties

- Fast Track Using BIM
- Early Questions
- Model Size
- Contract Model vs. Construction Model
- Question of Single vs. Parallel?

- Fast Track Using BIM
- Team Modeling

- Fast Track Using BIM
- Design Models
 - Architecture
 - MEP/IT Core Shell
 - Structural
 - Lab and Kitchen
 - Site/Civil

- Fast Track Using BIM
- 2-D Format
 - Fire Protection
 - A/V
 - Security
 - MEP Fit Out (late change)
 - Elevator

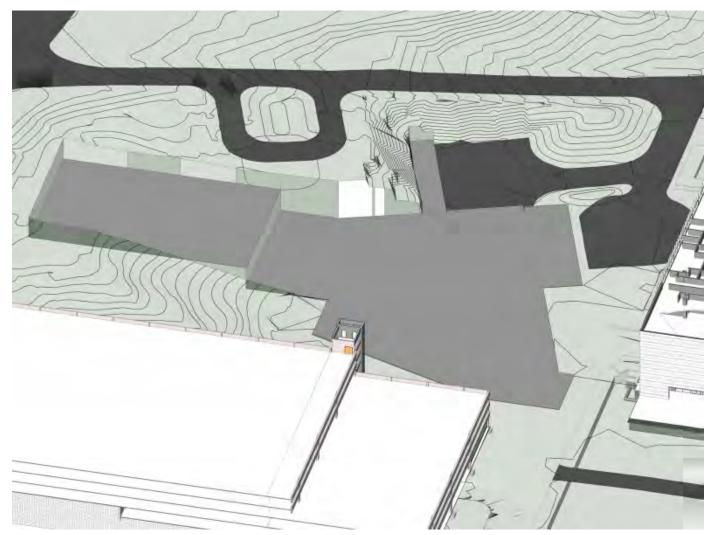

- Fast Track Using BIM
- Proxy Development and Work Flow Issues
- Watch for hazards!

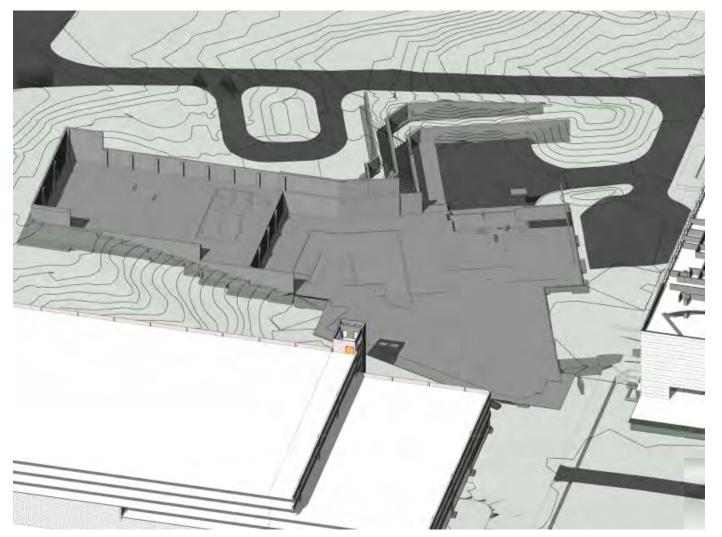

- Fast Track Using BIM
- TOTAL :11 Design
 Models
- Fundamental Structure
 - Core Shell
 - Edu
 - Lab

SITE PLANNING

CORE/SHELL STEEL STRUCTURE

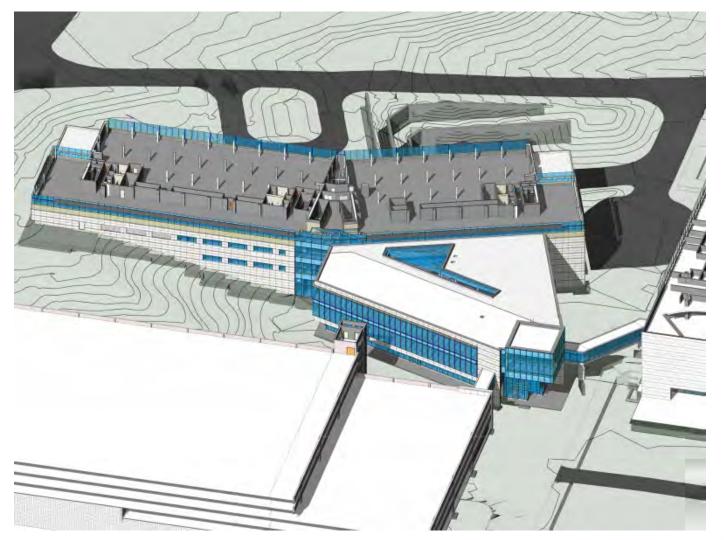

CORE/SHELL

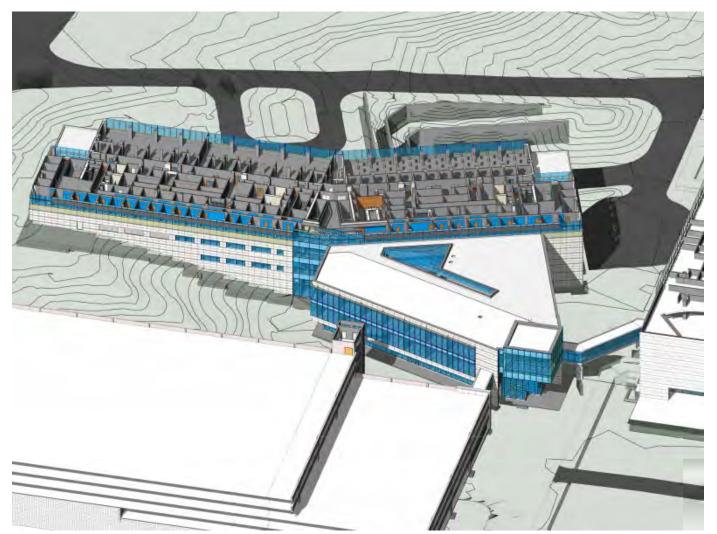

CORE/SHELL

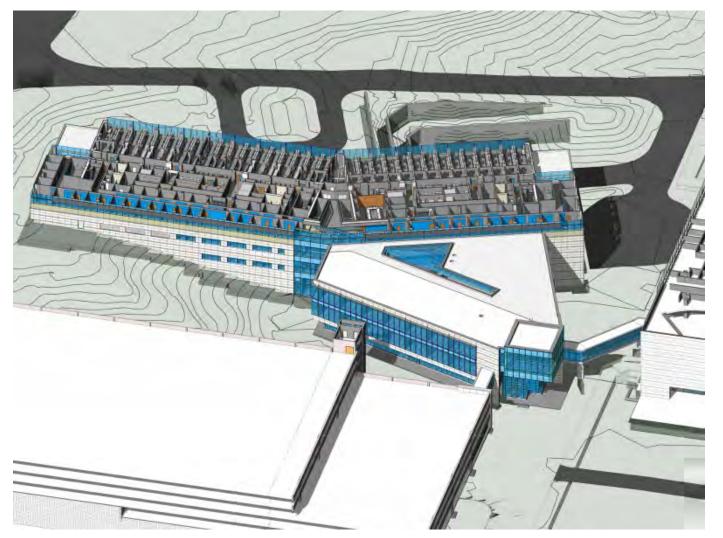

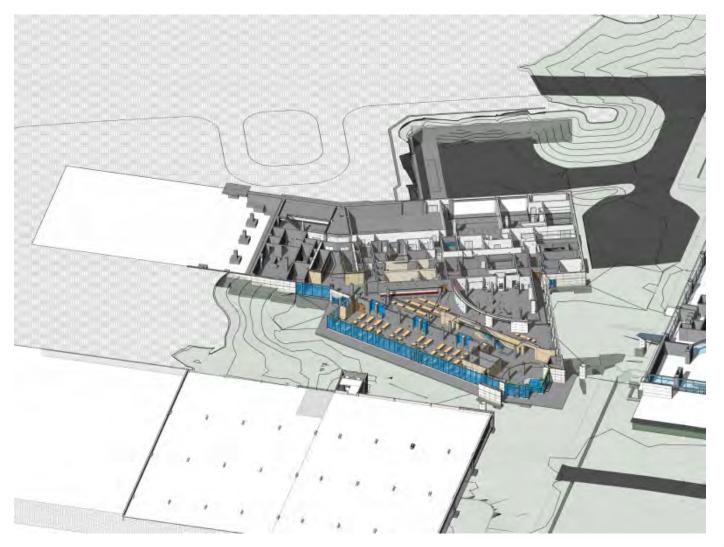

LABORATORY

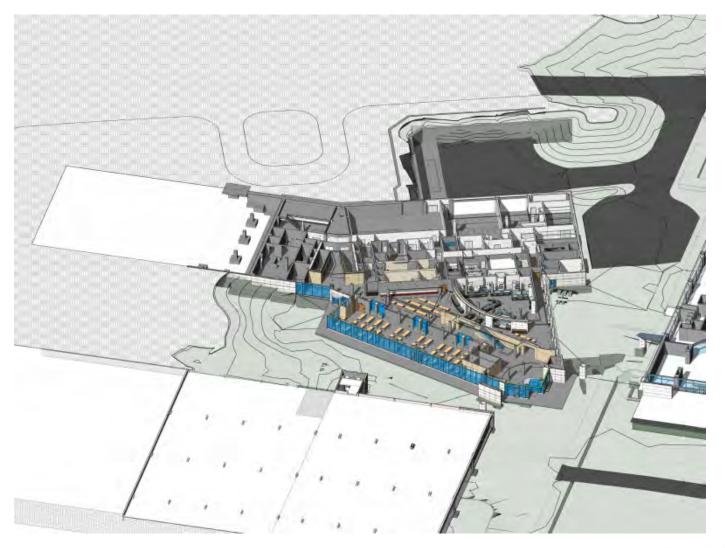

EDU

EDU

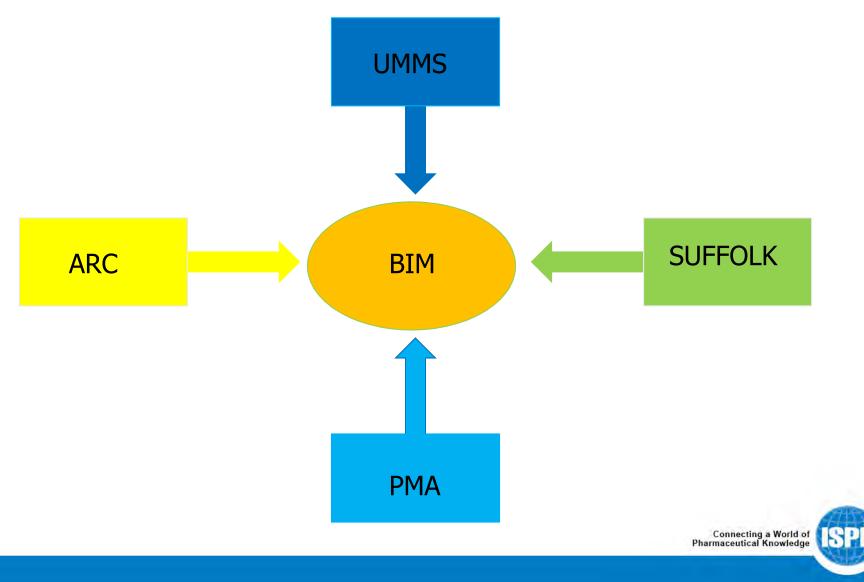

Single Phase Modeling		
Pro	Con	
Seamless exchange of information	Legal vehicle	
Consistency of design and construction	Design vs. construction needs	
	Increased time for planning	
	Conducive to fast track?	

Parallel Modeling		
Pro	Con	
High level of quality control	Cost of 2 models (depending on contracts)	
Less planning than Single Phase modeling	Increased need for coordination between Arch. and CM	
Flexible relationship		
Less legal hurdles		

Single Phase vs. Parallel Modeling		
Single Phase	Parallel Modeling	
Can be done in design/build or IPD model	Can be done in design/bid/build or CM at-risk	
Requires Arch. and CM to model with same priorities	Arch. and CM each have a model	
Model governs	2D drawings govern	

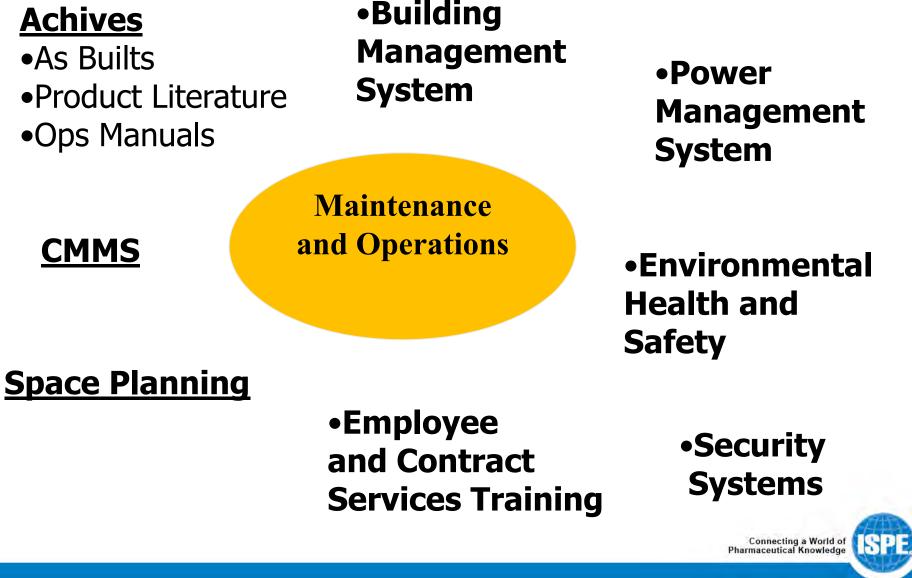

- Defining contract limits
 - Who owns what?
 - What is a contract document?
- BIM Peer Review

3D to FM

- SCCI coordinated their parallel model in-house and with ARC
- Model was shared with subs as part of the bidding process
- Team began to focus on resolving UMMS FM concerns

UMMS Facility Resources

UMMS Facility Management

- Building inventory includes over 6 million square feet of space
 - Level One Trauma Hospital with 400 licensed beds
 - Over 350 wet lab researchers
 - Schools of Medicine, Biomedical Sciences and Nursing
- Co Generation power with 17.8MW electrical generation, 450,000pph steam production and 16,500 tons of chilled water production
- Computerized Maintenance Management System tracks
 - 20,500 pieces of equipment
 - 5,000 inventory parts
 - 130 buildings
- Essential accreditations include TJC, CMS, CDC/APHIS SAT, AAALAC, and LCME

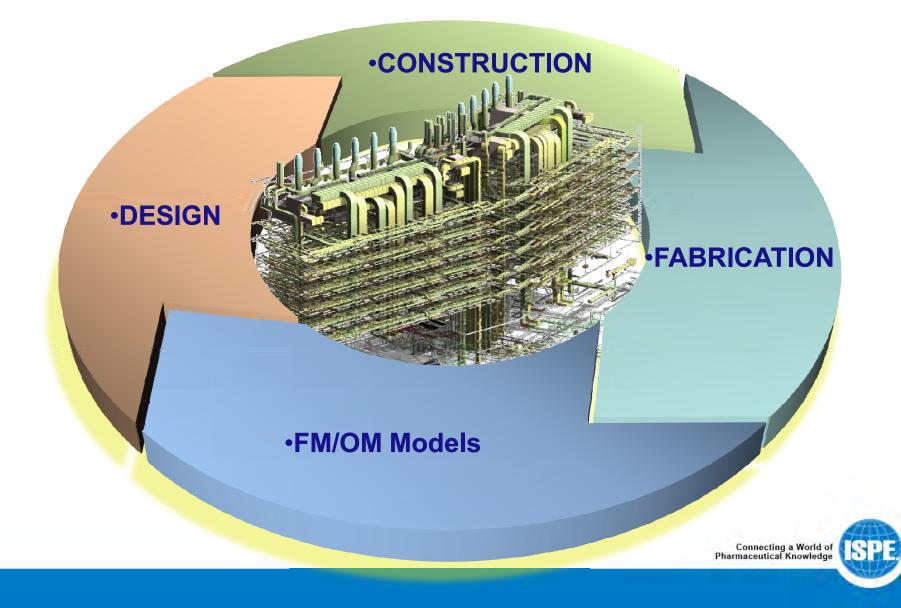

UMMS 6D Considerations

- Full spatial as-built
- Design and actual capacity of systems auto updates for design changes
- Asset tagging
- Ability to isolate a system for review
- Database of building information linked to a model
- Building Management System link

Beginning With the End in Mind

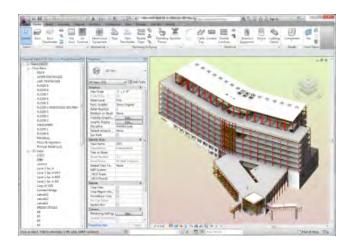

The Facilities Management BIM Model

Suffolk's 6D Definition...a model created for the long term maintenance and cost effective management of a building's life cycle.

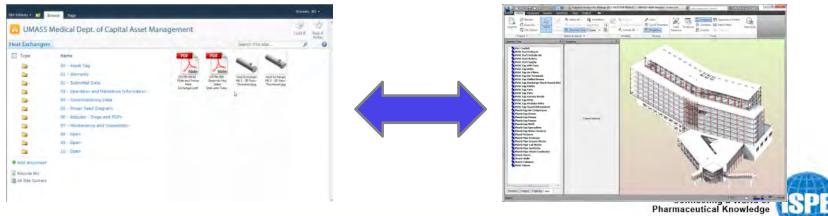

Suffolk's 6D Deliverable

Design Modeling Software

Virtual Document

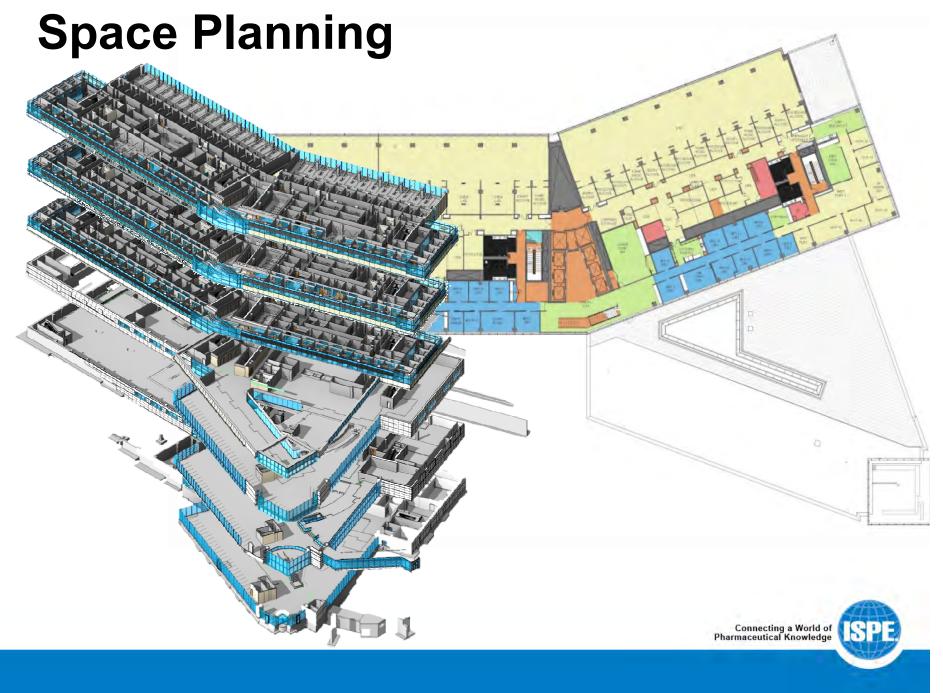

Clash Detection/Maintenance

Architectural Benefits

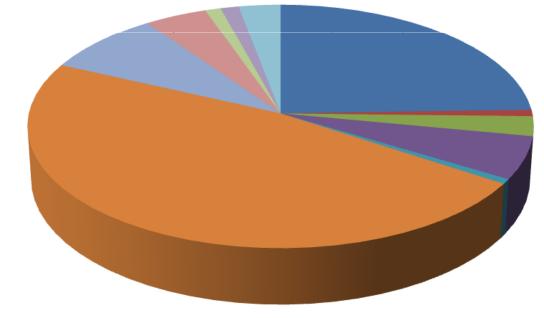

- Space Planning and Management
- Area Analysis
- Asset Management

Facilities Maintenance and Virtual Document Storage

Training

- Types of Training
 - New Building Initial Training
 - New Employees
 - Refresher Training
 - Contractor
 - Occupants
- 3D Models
- Electronic, searchable data base of all construction and maintenance documents
- Tracing piping, ductwork, electrical, etc
- Challenges
 - Multiply buildings with same operators/maintainers
 - Similar buildings with different systems and layouts

Required Trouble Shooting Information

- Basis of Design System Descriptions
- One-Line Diagrams all major components shown
- Control diagrams and sequence of operations
- Zone drawings
- Riser Diagrams
- Submittals
- Balancing Reports
- Commissioning Reports
- As-built drawings

The Accreditation Visit

- Show a since of confidence in building operations and code compliance to an inspector
- Visualization of the extent and location of special spaces
- Link to critical air balancing reports
- Linkage to real time data from the BAS and central fire alarm controls
- Link to the computerized maintenance management system – show the PM achievement
- Show the sequence of operations
- Show the HVAC fault diagnostic system
- "TRUST BUT VERIFY"

The Questions That Remain

- Management of the models by the owner?
- Future modification to the models thru renovations?
- Moving on from traditional facilities mindsets?
- Future use of models in a renovation environment?
- Approach to utilizing models for future design improvement?
- Linking to BAS Systems in the future?

Questions?

Speakers

- Erik Servies, AIA
 - Associate, PMA Consultants, Owner's Project Manager
 - eservies@pmaconsultants.com
- John Baker
 - Associate Vice Chancellor of Facilities, UMass Medical School
 - john.baker@umassmed.edu
